Santiago Clemente

3975 Chattooga Trail Marietta, 30062 | 404-940-5798 |santi.clemente123@gmail.com| Permanent Resident

Objective

Computer Engineering student trained across hardware and software, with hands-on experience building AI chatbots, workflow automation, and CRM integrations for real clients. Research experience includes two published papers on biomedical signal analysis, using EEG and GSR data to study human cognitive and emotional response. Seeking a Software Development internship starting summer 2027, with particular interest in roles bridging data analysis and applied engineering.

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – Present*
Bachelor of Science in Computer Engineering, GPA 4.00 Expected Graduation, May 2030

Skills

Programming: Java, Python (novice), C (novice), JavaScript (novice)
Hardware: Raspberry Pi, Microcontrollers, Arduino
Software: Android Studio, GitHub, Fusion 260, Microsoft Power Automate, Claude Code, n8n
Communication: Design proposals, technical reports, presentations (large and small audiences), research papers
Languages: English (fluent), Spanish (native)

Experience

Wind Consulting LLC | Atlanta, Georgia *May 2024 – Present*
Technical Advisor / Development
AI consulting firm specializing in workflow automation, conversational AI chatbots, and customer relationship management (CRM) integration.

- Built customer service chatbots that resolved 89% of inquiries without escalation.
- Automated quote generation, cutting turnaround from 50 minutes to 3 minutes.

Tijuana Joe's | Marietta, Georgia *December 2025 – Present*
Bartender / Customer Service
Full-service Mexican restaurant and bar known for craft margaritas, scratch-made cuisine, and community events programming.

- Executed craft cocktail program during high-volume service, averaging 70+ drinks per shift with consistent quality standards.
- Anchored team coordination on peak days including Cinco de Mayo, helping the venue serve 400+ guests — ~100% above typical volume — without service breakdown.

Projects

Emotional Correlations In Teen Video Games | Kennesaw State University, Internship, IoT Research Group *Summer 2023*
Lead Research
EEG-based research study examining whether violent and non-violent video game exposure produced measurable differences in neural activity and associated emotional response.

- Found no significant correlation between game violence and emotional response across all participants
- Published findings at the 1st Latin American Workshop on Structural Health Monitoring

GSR Insights into Cognitive Load and Distraction | Kennesaw State University, Internship, IoT Research Group *Summer 2025*
Lead Research
Physiological research study using galvanic skin response (GSR) to measure how stress and environmental distractions affect cognitive task performance.

- Tested participants on math and memory tasks under distracted and undistracted conditions, correlating GSR readings with performance outcomes
- Found that elevated stress measurably degraded performance and that even minor distractions produced significant accuracy loss
- Published findings at the International Conference on Computer Vision.
